

WINTER DRIVER TRAINING.

CONFIDENCE & CAR CONTROL.

MINI WINTER DRIVER TRAINING PROGRAMME.

MINI drivers probably think that this programme isn't for them.

With MINI's famous road-hugging traction and corner munching handling, surely a little snow and ice can't do any harm?

Much as we'd love to agree, even with ABS, MINI Winter Tyres and dynamic stability control we still have to admit that the best defence against an accident is a component that we don't manufacture.

The driver.

Not wanting to leave you in a lurch, MINI and Rally School Ireland have come together to design a course that prepares drivers (MINI drivers included!) for the type of hazardous conditions that come hand-in-hand with the winter weather.

WHO SHOULD ATTEND?

- » New and recently qualified drivers
- » Business and high mileage drivers
- » Nervous drivers
- » Emergency response (i.e. mission-critical) drivers
- » Anyone who has had difficulty driving in winter conditions.

The MINI Winter Driver Training programme is the perfect way to boost your confidence and ability behind the wheel as we enter the winter months.

We've kept the classroom stuff to a minimum and jammed the MINI Driver Training course with practical experience carried out in a controlled, safe environment.

ON THE MINI DRIVER TRAINING COURSE YOU'LL LEARN HOW TO:

- » Reduce your reaction time, improve your car control and raise your confidence level
- » Be safer in slippery conditions
- » Recover from skids
- » Use ABS (Anti-Lock Braking System) for evasive action
- » Feel the difference between MINI Winter Wheels and Tyres and Summer Tyres
- » Experience understeer & oversteer tests
- » Properly change lanes in an emergency
- » Control traction at a junction, mid-corner or low-friction surface
- » Experience the stability programmes in a MINI.

WINTER TYRES.

When temperatures drop below 7°C, Summer Tyres start to lose their effectiveness. The hardening of their rubber negatively affects acceleration, braking and handling.

That's why we recommend switching to MINI Winter Tyres when temperatures drop to below 7°C. They are made from a different rubber/silica compound so retain their flexibility and performance during the colder weather.

For more information, or to book your place on the programme call Rally School Ireland on **1890 236 464 (BE MINI)** or visit **www.minidrivertraining.ie**

Rally School Ireland operate the MINI Winter Driving Training Programme in cooperation with MINI Ireland.
